EDUCATION

2008 - 2013

- School No. 210
- Elementary School

Studied for 4,5 years in Russian language based school.

2013 - 2019

- School No. 194
- Middle - High School

I've studied in this school for 7 years till graduation. In that school I've participated in web-dev hackathon, helped a lot in fixing network infrastructure and was here as an IT assistant.

2019 - 2023 (NOW)

- Information Security Bachelor
- Kyiv Borys Grinchenko University

Now I'm studying for Information Security and participating in many local projects, connected with developing web apps, bots and so on. Just now I'm developing my own Learning Management System, which is supported by university as a student project.

EXPERIENCE

Dec 2017 - Current

Front-End Developer

aaa114-project

It's my own open-source project. The website is working on PHP, and I was improving my skills in the mentioned programming languages by developing that website and the sub-projects.

Jun 2018 - Jul 2018

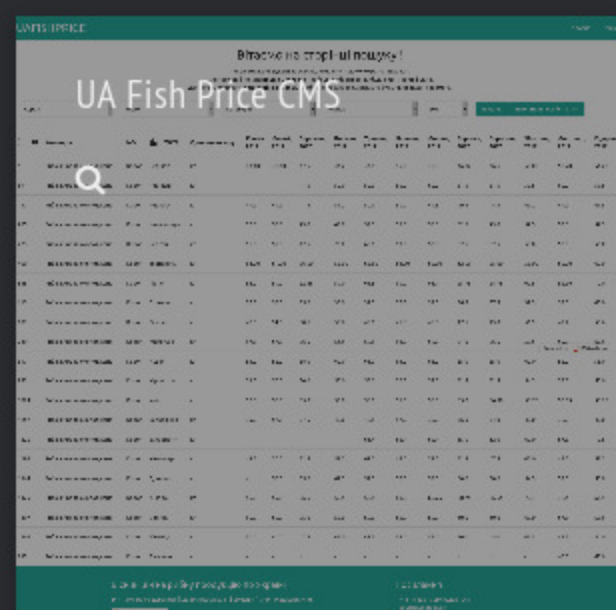

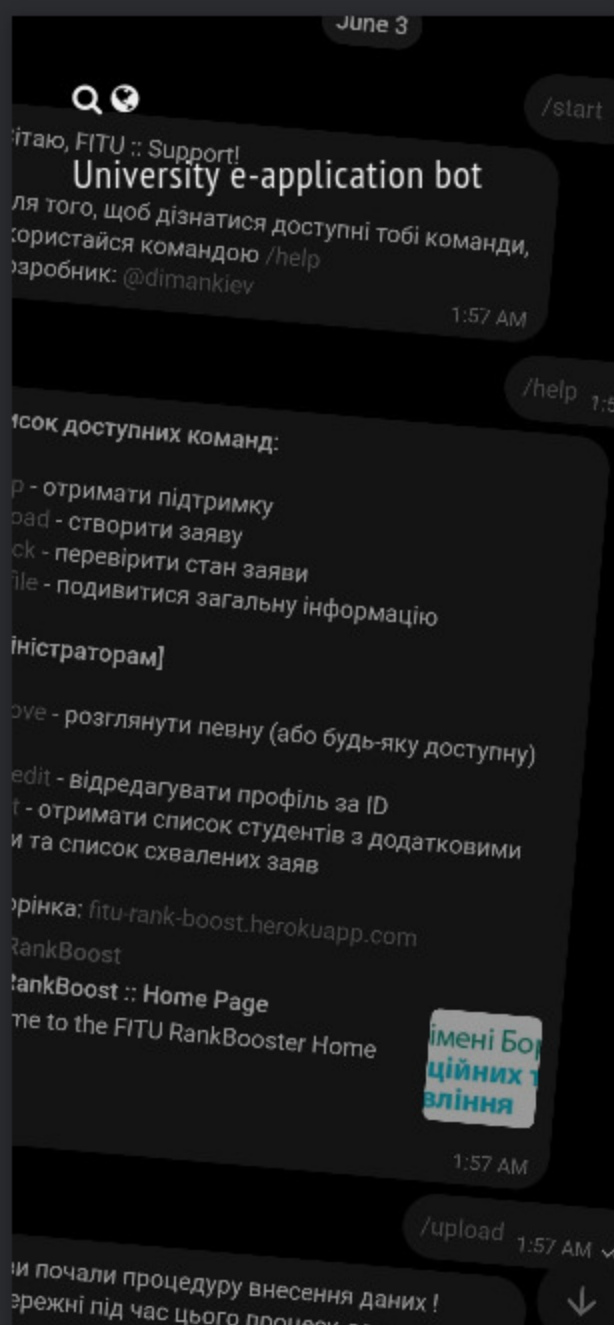

Front-End Developer

Single project

European organization SAFPI (Support to Agricultural and Food Policy Implementation), was interested in CMS, which have to operate with big DB, filled with data about average fish price in all Ukrainian regions. So I've developed a fully working sketch, which was written on HTML, CSS, JS, jQuery as a front and on a PHP as a backend.

PORTFOLIO

- All
- Data Engine
- Telegram bot
- Website

INTERESTS

My hobbies are always connected with creativity, thinking "out of the box" and creating something new.
